PROJECTS

Spacee: Full stack fully functioning web application. Spacee is the place to find all the latest space news, space launches, events, and where over the world the ISS station is. The user can also view NASA's photo of the day and can also save specific events or the entire calendar to their own personal calendar.
Languages Used:
- Node.js
- Express.js
- Handlebars.js
- Sequilize

Deployed Application: https://github.com/bborumoore/space-e

GitHub Repo: https://github.com/bborumoore/space-e

Mars Daily: A collaborative project that gives the daily weather on Mars along with a picture from one of the Mars rovers. The website will allow you to sign-up via email and receive daily Mars updates. You can also interact with the website by scrolling through daily pictures directly from the Mars Rover Perseverance.
Languages Used:
- HTML
- CSS
- Javascript
- JQuery CDN & API Documentation
- Materialize

Deployed Application: https://bborumoore.github.io/mars-daily/

GitHub Repo: https://github.com/bborumoore/mars-daily
